DETAILED ACTION

Response to Amendment

This action is in response to the Applicant's amendment filed on April 23, 2008. Claims 1-50 are pending. Claims 11, 12, 21, 22, and 24-49 were withdrawn in a previous Office Action and remain withdrawn. Claims 1-10, 13-20, 23, and 50 will be considered for examination.

Applicant's amendment is sufficient to overcome the rejection under 35 U.S.C. 112, 1st paragraph given in the previous Office Action. This rejection is withdrawn.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7, 10, 13, 14-18, 23, and 50 are rejected under 35 U.S.C. 102(e) as being anticipated by Eldridge et al. (US 6,421,716 B1) ("Eldridge").

Referring to claims 1-7, 10, 13, 14-18, 23, and 50: Eldridge teaches a service information providing apparatus comprising: a service providing part configured to provide a service which a user utilizes (*col. 4, lines 24-36; col. 10, lines 4-10*), wherein said service providing part further includes a service information providing part configured to provide information concerning the service in response to a request from a user terminal to the user terminal (*col. 4, lines 24-36; col. 10, lines 4-10*), the information including at

least a port number of an end point of the service (*Figure 7, "706": "PRINT SERVICE COUPLED TO IR PORT"*), an operation status of the service (*Figure 7, "500": "STATUS: PRINTING"*) and an implementation type of the service (*Figure 8, "804": "COLOR PRINT SERVICES; SCAN SERVICES"*) and enabling the user to utilize the service when selected, and wherein the service is configured to operate a hardware resource which performs image formation (*col. 10, line 39 – col. 11, line 25*).

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 8, 9, 19, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eldridge et al. (US 6,421,716 B1) ("Eldridge").

Referring to claim 8, 9, 19 and 20: The cited prior art discloses or suggests all the limitations of claims as noted above. The cited prior art does not teach that the information concerning the service stored in said service information storing part is written in at least two languages, and the request includes language indication information indicating a language of the information of the service, the information to be included in a response corresponding to the request. However, the Examiner notes that this limitation is not functionally involved in the elements of the recited system. Therefore this limitation is deemed to be nonfunctional descriptive material. The elements of the apparatus would be the same regardless of what language the service was written in. The difference between the claimed invention and the prior art is merely

subjective. Thus this nonfunctional descriptive material will not distinguish the claimed invention from the prior art in terms of patentability, see *In re Gulack*, 703 F.2d 1381, 1385, 217 USPQ 401, 404 (Fed. Cir. 1983); *In re Lowry*, 32 F.3d 1579, 32 USPQ2d 1031 (Fed. Cir. 1994) also see MPEP 2106. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to write the service of Eldridge in whatever language the user desired because such information does not functionally relate to the elements of the claimed system and because the subjective interpretation of information does not patentably distinguish the claimed invention.

Response to Arguments

Applicant's arguments with respect to claims 1-7, 10, 13, 14-18, 23, and 50 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's arguments with respect to claims 8, 9, 19 and 20 have been fully considered but they are not persuasive. The Applicant has argued that the limitations of claims 8, 9, 19, and 20 are not nonfunctional descriptive material because the data displayed is different depending on the type of language the user terminal uses. However, this is not claimed in the claim language. The Appellant appears to be incorporating limitations from the specification into the claim language. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
